

Final project proposal

November, 2023

Skoltech

General comments and suggestions

For all students: Title of the project (Task you try to solve).

Please add sections: Motivation, Goal and Tasks, Expected Results.

Separate all tasks into tasks *minimum* (those that you will achieve for sure) and tasks *maximum* (those you plan to do, but maybe won't have enough time to finish them or you are not sure if they will work).

Please write about specific tasks! Now it is too vague.

Use a proper citation style (ACS is preferred). Do not mix English proposal with Russian state standard (GOST).

Suggested templates

You may use any template up to you, which is readable and follows all required criteria.

We suggest you to use of the following LaTeX templates:

[LaTeX template official example](#)

[LaTeX template nonofficial example](#)

Or create a similar one in docx, using pdf example:

[Pdf template nonofficial example](#)

List of tutors

Rustam Arabov – Artem Dembitskiy
